

Deployment Scenarios: GXW series VoIP Gateways

Almost all telephony and Unified Communications deployments will require the use of a Gateway. Grandstream's GXW series provides a variety of easy-to-install, easy-to-manage and powerful Gateways.

FXO Gateways: Convert PSTN to VoIP/SIP

Our GXW4100 series Gateways allow you to connect a modern VoIP platform with PSTN trunks

FXS Gateways: Connect a Legacy Phone System to a VoIP Provider

Use our our GXW4200 and GXW4000 series to upgrade your legacy phone system and save on communication costs by integrating it with SIP trunks from an ITSP.

FXS Gateways: Migrate from a Legacy System to an IP PBX

Use our our GXW4200 and GXW4000 series to upgrade and/or expand you communications platform by integrating an IP PBX and VoIP service with your existing legacy system.

Deployment Scenarios: Analog Telephone Adapters

Grandstream is the world's leading manufacturer of ATAs and we provide these award-winning devices to some of the largest service providers in the world.

Businesses: Connect Analog Devices to an IP Network

Extend the life of analog devices by integrating them with your SIP network and extending SIP accounts to them.

Consumers: Save Money by Turning Your Analog Phone into a VoIP Phone

Save a ton of money on your phone costs by purchasing a VoIP service plan. Our ATAs allow you to connect your trusty old analog phone to any VoIP network or service.

Use Your ATA as a Router

Our HT800 series, HT502 and HT503 allow you to use your ATA as both a router and to receive VoIP service.
